EXAMPLE:

Please ban cigarette filters. The current measures in the SUPD (awareness raising and EPR) have had no effects. It's the most found item in our cities, nature and waters. It does NOT reduce the harm risks of smoking. It's a very polluting and unnecessary item. Support for a filter ban is growing worldwide. It's time to end 80 years of pollution and deception. Let's protect our planet, ourselves and future generations from this toxic pollution. You know what is the right thing to do. Thank you!

Honourable Members of the European Commission, We have learned that there is an opportunity to respond before the evaluation of the Single-use Plastics Directive (Single-use Plastics Directive, 2019). My experience and concern about the cigarette filter is more than just environmental involvement, although this is of course the most important. I regularly travel by public transport, always in the odour and view of all those toddlers who are simpl...

First, the choice of single-use products has failed and many more important products have been excluded from the list, for example tobacco filters. Secondly, as a result, similar products are imported from Asia, including from local wood, for which there is no guarantee of safety. Products are also made in plastic and wood mixtures, which are challenging to recycle using traditional methods. Thus, as a general rule, those products are incinerated...
